

GHADA ABDULLAH ALSULAMI

IT & AI Graduate | Networking, Project Management, Data Analysis & Reporting, IT Support

Jeddah, Saudi Arabia | 0545726260 | gabdullh84@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

IT and Artificial Intelligence graduate (MSc AI, First-Class Honors, GPA 5.0/5.0; BSc Information Technology) with a well-rounded technical foundation spanning IT support, networking, project management, data analysis and reporting, and machine learning. Hands-on first-level technical support experience gained at King Fahad Medical City, including hardware/software troubleshooting, PC deployment, incident documentation, and Windows systems support in a multi-user environment. Built five end-to-end AI and software projects covering computer vision, multimodal data fusion, explainable AI, and classical AI game strategy, and certified in Power BI, SQL, Data Analysis, IT Project Management, and networking (including a 4-course Computer Communications specialization from the University of Colorado). Proficient in Excel and the full MS Office Suite. Detail-oriented, analytical, and a quick learner with strong communication skills in English and Arabic, seeking to apply this broad technical skill set across IT, data, project coordination, or AI-related roles.

EXPERIENCE

King Fahad Medical City (Healthcare Setting)

Riyadh, Saudi Arabia

Administrative & Technical IT Intern — 3 Months | 2022

- Provided first-level technical support for hardware, software, printer, and network-related issues in a multi-user environment, resolving requests within agreed timeframes.
- Installed, configured, deployed, and maintained desktops, Windows systems, and IT peripherals; supported end-users with day-to-day technical issues.
- Assisted with troubleshooting network connectivity issues and supported general IT operations.
- Maintained accurate technical documentation and issue records to support consistent IT operations.
- Collaborated within a multi-disciplinary team to deliver reliable, customer-focused technical support in English and Arabic.

EDUCATION

King Abdulaziz University

Jeddah, Saudi Arabia

Master of Science (MSc) in Artificial Intelligence — GPA: 5.00/5.00, First-Class Honors | 2026

University of Jeddah

Jeddah, Saudi Arabia

Bachelor of Science (BSc) in Information Technology | 2023

PROJECTS

RescueVision AI — Emergency Response System — github.com/Gadah12/-rescuevision-ai-emergency-response

- Multimodal AI (YOLOv8 + Generative AI) that detects vehicle accidents, scores risk, and auto-generates emergency reports.

NeuroVision AI — Alzheimer Risk Screening — github.com/Gadah12/-alzheimer-early-risk-screening

- Fuses MRI, voice, and text (MobileNetV2 + CNN + NLP) into one explainable Alzheimer's risk score.

Deepfake Detection System — github.com/Gadah12/-deepfake-detection-video-calls

- MobileNetV2-based model detecting deepfake faces in video calls, achieving 0.997 AUC.

Multimodal Skin Disease Classifier — github.com/Gadah12/-skin-disease-multimodal-classification

- EfficientNetB3 + symptom text fusion for 9-class skin disease classification with Grad-CAM explainability.

DDPS — Driver Drowsiness Prediction System (1st Place)

- Developed a CNN-based Android application detecting driver fatigue in real time via eye-state analysis; secured 1st Place among competing IT graduation projects.

Battleship Game with a Minimax AI Opponent — github.com/Gadah12/battleship-ai-easyai

- Built a strategy game with an AI opponent using the Minimax algorithm (easyAI library), including a graphical interface with live board tracking.

CERTIFICATIONS & TRAINING

- Computer Communications Specialization (4 courses: Network Fundamentals, Peer-to-Peer Protocols & LANs, Packet Switching, TCP/IP & Advanced Topics) — University of Colorado, Colorado Springs (Coursera)
- IT Project Management — Doroob; Software Design and Project Management — HKUST; PMP Training — 35 Hours (Dar Al-Ru'a, TVTC-Accredited); Foundations of Project Management — Google
- Data Analysis — Misk Foundation & STC; Data Science and AI — Monsha'at Academy; SQL 103 (Advanced) & Power BI 101/103 — Sattar, Tuwaiq Academy
- RDBMS — IBM; Cloud Computing Basics — LearnQuest; IoT Wireless & Cloud Computing, Intro to TCP/IP — Yonsei; Networks and Cisco Devices — Coursera; HTML, CSS & JavaScript — Johns Hopkins
- Cybersecurity Threats, Vulnerabilities & Attacks — Tuwaiq Academy; Ethical Hacking & Hardware/Upgrade Support — Cisco; Incident Response Analysis — Misk Foundation

SKILLS

IT Support: Hardware, Software & Printer Troubleshooting, Windows Installation & Setup, PC Deployment & Configuration, Technical Documentation

Networking: DNS, DHCP, SSL, TCP/IP, OSI Model, LAN/WAN Basics, Network Architecture & Protocol Design, Cisco Devices

Data, Reporting & Office Tools: Excel (formulas, data analysis), Power BI (101 & 103), SQL (Advanced), Data Analysis, RDBMS, MS Office Suite (Word, PowerPoint, Excel, Outlook)

Project Management: IT Project Management, PMP Fundamentals, Tracking & Reporting (Weekly/Monthly/Yearly), Meeting Deadlines, Prioritization

AI & Programming: Python, Machine Learning, Deep Learning, Multimodal AI, Java, C++, HTML/CSS/JavaScript, Git/GitHub

Systems (Coursework): Active Directory (AD), DFS, Print Services, SCCM, Windows/macOS/Linux fundamentals, Cloud Computing, Data Governance & Backup/Disaster Recovery Principles

Cybersecurity: Threats, Vulnerabilities & Attacks (Tuwaiq Academy), Ethical Hacking Fundamentals (Cisco), Incident Response Analysis (Misk Foundation)

Professional: Customer-Focused Support, Problem Solving, Attention to Detail, Communication (English & Arabic), Team Collaboration, Working Under Pressure

VOLUNTEERING & LANGUAGES

Organizer — Al-Mubarmij Al-Sagheer Initiative & Safe Browsing Initiative, University of Jeddah | Arabic (Native), English (Intermediate — STEP)
